Examiner's Statement of Reasons for Allowance

1. Claims 1-104 are allowable over the prior of records.
2. The following is an Examiner's statement of reasons for the indication of allowable subject matter: As for claims 1, 5, 9, 13, 17, 21, 25 and 29 are allowable over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior arts. Prior arts fail to teach a second request section for requesting the system interface communication section to receive a report of the permission of the execution of the second reset processing from the system controller. As for claims 33, 37, 41, 45, 49, 53, 57 and 61, prior arts fails to teach a determination section for determining whether the data transfer between the upstream device and the data buffer has been completed or not based on a report from the host data transfer section on the data transfer and a report from the buffer data transfer section on the data transfer. As for claims 65, 69, 73, 77, 81, 85, 89 and 93, prior arts fail to teach (a) a first request section for updating the data stored in the data buffer in accordance with the request from the system controller that the update of the data has been completed; and (b) a second request section for requesting the system interface communication section to report to the system controller that the update of the data has been completed; and (c) a third request section for requesting host data transfer section and the buffer data transfer section to transfer the updated data in accordance with the request from the system controller to transfer the updated data to the upstream device. As for claims 97-104, prior arts fail to teach a request section for requesting the system interface
